Mayor Jacyno made a special announcement regarding the recent infrastructure funding awarded to the City. He advised that under the Infrastructure Stimulus Fund the City's application was approved for \$1.5 million, the City's share of this funding is \$500,000. The application was for the development of a Winter Maintenance and Control Activities facility which will consolidate the existing sites and uses in the City of Pembroke, and will make high profile lands available for redevelopment. The project will involve the construction of an approved Snow Disposal Facility; decommissioning the existing Snow Disposal Facility and transfer of lands for the eventual construction of a new Algonquin College Campus; consolidation of miscellaneous materials storage function; and future decommissioning of existing Salt Storage Facility for eventual commercial or residential development. The project is slated to begin this fall with completion by fall 2010.

Mayor Jacyno advised that the City also received funding under the Building Canada Fund – Intake 2 (Communities Component). The application was approved for \$3 million, with the City's share being \$1 million. The City previously received funding under Intake 1 of the program to reconstruct Pembroke Street West. This new project will be to reconstruct Alexander Street from Pembroke Street West to the railway. This reconstruction will develop Alexander Street as the major link between the new Algonquin College Campus and main street as well as support the renewal plan for the City's downtown urban core. The final design work should be completed this fall with construction to begin in spring 2010 with completion in fall 2010.

Mayor Jacyno thanked MP Cheryl Gallant and MPP John Yakabuski for lobbying on behalf of the City for infrastructure funding. He also thanked staff for preparing the applications.
